

Ideas for work streams Feeding Bradford and Keighley 2024/25

At the AGM we asked for suggestions for the coming year and what we should focus on. These are the suggestions which will be further discussed at a steering group meeting.

Supporting projects

Pantry transition – are pantries fit of purpose – how can we support them to be resilient?

Share best practice.

Localise meetings – to attract new and old agencies and people to share local issues.

Strategies on funding- access and awareness

Great work being done. Be great to continue all this work, partnership work and networking.

Campaigning

Continue to challenge and shape funding streams.

Profiling the challenges of excluded groups

Public campaigning? Or linked with partners? Media Profile if partners want to showcase projects or key messages.

Gareth has press release template – all agreed a well written press release about something newsworthy with a photo will usually get published in T&A.

Including lived experience and quotes

Other / New ideas

All foodbanks to be using the same patten and information in their operation.

Encouraging giving /cooking more than crappy food (think this is in response to the hotels giving asylum seekers crappy food not the food projects)

Healthy Start champions connecting with more schools.

Measuring wellbeing impact – have a common method.

Training for volunteers

Ensure we have voices of service users locally.

Baking Braking Bread – as strategy telling sharing cultures & eating together.
